

Randomized Bingo Calling Lists

This is a sample Randomized Bingo Calling List using our predefined "Animal" word list. These lists contain all the words in the custom bingo card design in a random order. Generate and print as many of these lists as you need. Call each word in the list in order and check them off as you proceed until someone has Bingo. You can reuse a list by using it in reverse, using every second term, etc.

Note: If your custom design uses the "A word can appear in any column." you will only get the phrase, e.g. "antelope", you will *not* get a the column prefix, e.g. "B".
